

## FIREFLY AUDIO BOOKSHELF SPEAKER STANDS

The Soundsmith “Versa-Stand” provides elegant solutions for bookshelf speakers offering easily adjustable height, speaker pointing, secure/safe speaker box fastening and a means to hide the speaker wiring.

The “Versa-Stand” can be quickly adjusted, allowing speaker heights of 10”, 20” and 30”. Due to the unique slotted, sectional design, higher versions can be easily made using extra pieces and floor securing hardware. The platen for holding the speaker employs a clutch assembly for securing and easily changing the pointing angle of the speakers.

“Versa-Stands” are available from stock in either Cherry, Maple, Walnut and Honduras Mahogany. Special order woods and stains are also available.

PATENTS PENDING.
