

## FIREFLY AUDIO BOOKSHELF SPEAKERS

### *The Dragonfly*

The Dragonfly Speakers, by Peter Ledermann, Chief Engineer of the SoundSmith Corporation, represent the distillation of 35 years of audio engineering.

*“... seemed to impress everyone was the SoundSmith room... and an array of very affordable small speakers which provided perhaps the best sound (from small and sanely priced speakers) at the show.” Dennis Davis, contributing Reviewer for Hi-Fi+ Magazine*

Designed to provide smooth response into the deep bass region, excellent imaging and warm midrange from an easily positioned enclosure, the Dragonfly Bookshelf speakers employ the most stable loudspeaker materials and production methods known. They also feature tweeter protection and peak amplifier power indication.

Firefly Audio speakers will easily fill a room with wall to wall sound, and are engineered to provide many years of revealing sound reproduction.

# TECHNICAL SPECIFICATIONS:
